Lamelech Seal Impressions

Jar handles stamped with the ancient Hebrew word “LMLK” are called ***lamelech***. The word LMLK means “belonging to the king.” It seems this is the royal insignia of the Judean kings. Often the name of the city is included in the inscription which helps accurately identify the site being excavated. Below is a list of the top 20 sites where the Lamelech seals have been found along with the number found. Most sites are from the southern kingdom of Judah (total of 71), but the northern kingdom has had 4 sites:

- 415 Lachish
- 281 Jerusalem
- 163 Ramat Rahel
- 92 Gibeon
- 88 Mizpah
- 71 Beth Shemesh
- 39 Moresheth-Gath
- 37 Gezer
- 24 Khirbet el-Burj (northwest suburb of modern Jerusalem)
- 19 Mareshah
- 17 Azekah
- 15 Timnah
- 14 Gibeath
- 13 Tel Erani
- 13 Hebron
- 13 Sokho (Socoh, Khirbet Abbad NW of Hebron, not Sokoh SW of Hebron)
- 11 Beth Zur
- 9 Arad
- 8 Nahal Tut
- 6 Gath (city)

These are not marked with the Lamelech seal, but are handles.

Jezreel Valley Passes

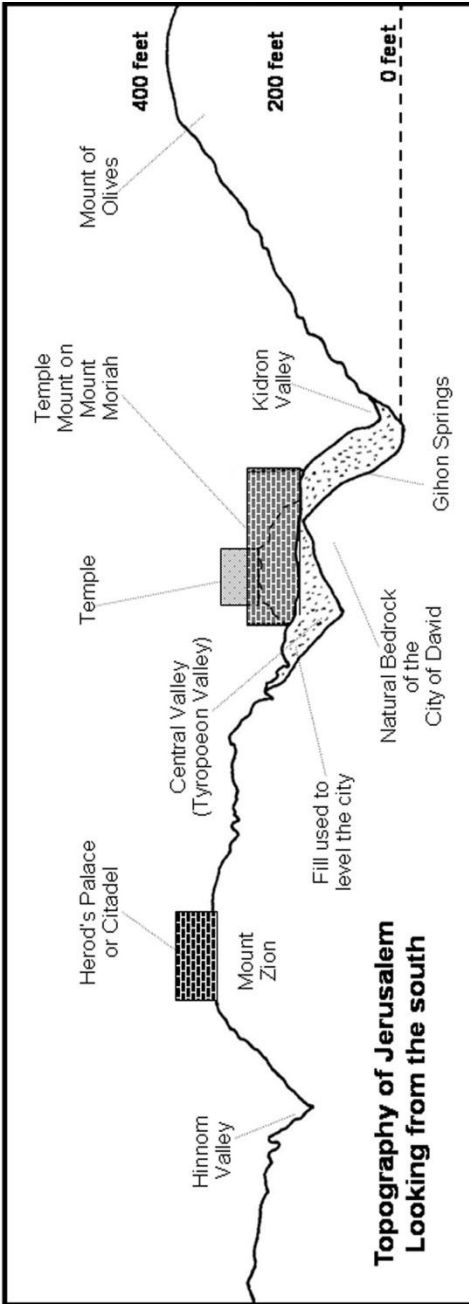

Traveling up the International Coastal Highway (Via Maris) the traveler would have to begin to move east away from the coast near Aphek in preparation to enter the Jezreel Valley through one of four basic passes through the Mount Carmel mountain range.

Topographical Cross-Sections

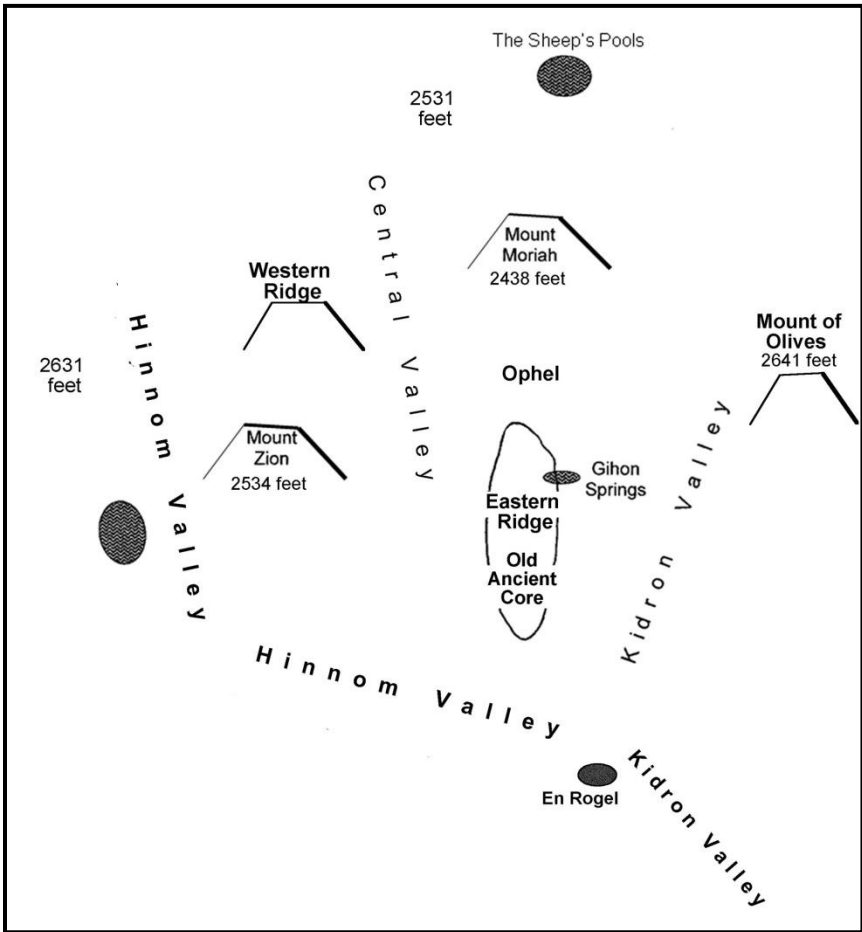

Jerusalem: Topographical Cross-Sections

Jerusalem's original location was not chosen because of its proximity to major roads. In fact, it is far from the international highways of the coastal plain and Transjordan. The closest major local roads in Old Testament times were located a half mile to the west (the southern Ridge Route) and more than 5 miles to the north (running from Gezer to Jericho). The most desirable feature of the site was the natural defense provided by hills and valleys to the south and east combined with a difficult approach from the west due to climbing elevations and the deep rugged valleys of the Judean hill country. Jerusalem sat on a rugged hill at the height of the hill country of Judea on local roads going nowhere and surrounded by the natural defense of valleys. This meant foreign invaders travelling through the land would often bypass Jerusalem entirely. The original city of the Jebusites, which became the City of David, is located on a ridge south of Mount Moriah known as the Old Ancient Core. This ridge of rock (also called the Eastern Ridge) which became the city of Melchizedek, the Jebusites, and David was lower than Mount Moriah to the north, lower than the larger Western Hill to the west, and lower and smaller than the Mount of Olives to the east.

Jerusalem's Topography

Jerusalem has three valleys: Hinnom, Central and Kidron. There are three ridges or hills: Western Hill (with Mt. Zion), Eastern Hill (with Mt. Moriah) and the Mount of Olives.

SEPPHORIS

Glossary

Ashlar – a six sided stone cut to be stacked without mortar. Often with a faced front, boss and margin chiseled

Casemate Walls – two thinner, parallel walls with empty space between them. It was faster and cheaper to build, plus the inhabitants could live in the space until a time of war when the space would be quickly filled in with debris and stone to strengthen the wall.

Decantation Pool – a pool used to pour off the wine without disturbing the sediment.

First Temple Period – the time of Solomon's Temple (970-586 BC)

Fresco - a technique consists of painting in pigment mixed with water on a thin layer of wet, fresh (hence the name) lime mortar, plaster or wax.

Glaci –an artificial slope of earth constructed against a city's wall to keep any potential assailant climbing a steep, slippery slope while under the fire of the defenders.

Lisan – (in Dead Sea) - a piece of land that separates the north and the south basins of the Dead Sea. It is Arabic for "tongue." The peninsula is located in the territory of the country of Jordan. It separates the northern section of the Dead Sea from the shallow southern part.

Odeon - A type of theater in ancient Greek culture that is smaller than the dramatic theater. It is usually roofed. Poets and musicians performed their arts here and often contended for prizes.

Ostrakon – (Ostraca) - a piece of broken pottery scratched with words

Quay – a structure parallel to a bank of water to use as a landing place where ships load and unload.

Shephelah – the foothills next to the coastal plain or lowlands

Tel - The word 'tel' is from the Arabic language, meaning mound or mount. Natural and cultural disasters such as earthquakes, fires, and war knock down buildings and walls leaving cities in piles of rubble. There is often no way to remove all the debris so the cities are left as mounds that are eventually covered with grasses, brush and other growth. This mound of remains is called a tel. In many cases people built right on top of the ruins.

Wadi – (Nahal) - the bed or valley of a stream that is dry except during the rainy season
